Working in the Style of Famous Photographer

Part 1: January 6-14, 2014
The list below contains the names of several famous artists and photographers through history. From the list, find four whose work you admire. This will require you to research. You may use http://whs.westborough.libguides.com/photojournalism for descriptions of the artists’ work and research further about a particular photographer if the information intrigues you.
Your final assignment requires you to type a description of the work of the photographer/artist that you chose. Be thorough and detailed in your writing. Put in your own words.
Your descriptions should include:
- The years that the photographer was active.
- Where the photographer was active.
- If the photographer used color, black & white, or both. Did they do one more than the other? Was there a reason for their choice?
- The most common subjects of their photos. (Portraits of royalty, landscapes of the American Southwest, celebrities, etc.)
- If the photos are staged or spontaneous.
- Why did this photographer photographs resonate with you? What did you like and what did you not care for about their photographs?

For each of your 4 photographers, include a thumbnail of one of the photographers iconic photographs, a paragraph explaining why this photographer and his or her work appeals to you (use the above questions as starting off points), and list at least 2 websites (other than Wikipedia) where you can view their work, these should be live links,. Drop assignment in the Student Drop Box: Your Name _FP_Date
